Life ... at university

University life is different from school life in many ways.

1 University life sometimes means living away from home.

Now you are responsible for your life. In the past, perhaps, your parents **managed** your life. Perhaps they made meals for you, took you to school and **reminded** you to do homework or revise for a test. Now, you must do everything for yourself. Buy a calendar. Mark all the important dates and times on it – lectures, deadlines for assignments, the dates of tests and examinations. Never miss deadlines, and always prepare for tests and examinations.

You are also responsible for managing your health. Eat **sensibly** and get enough sleep. Work hard, but relax too. Do **extracurricular** activities – join social clubs at the university or in the city.

2 University life sometimes means sharing accommodation.

You don't have to make friends with flatmates. But you must **respect** them. Don't use their possessions. Never go into their rooms without **permission**. At home, perhaps, you only had to clean your bedroom. But in your hall or flat, clean the kitchen and the bathroom after using it.

3 University life usually means working harder at your studies.

You probably found school work hard sometimes. But university work is usually much harder. Don't worry about this. Most university students feel the same. Always do your best. Spend at least two hours on private study for every hour of lectures.

4 University life sometimes means learning new language skills.

You learnt English at school. Your English is good. But you need new language skills at university. Learn how to listen to lectures. Learn how to participate in tutorials. Learn how to do reading research **efficiently**. Learn how to write essays.

5 University life always means developing critical thinking.

At school, you wrote essays with titles such as 'Describe the water cycle.' 'Compare and contrast the physical features of two small countries.' But at university, lecturers often give titles to make you think. For example: 'Schools are like prisons. Discuss.' Research the topic. Find out the facts and the ideas of other people. Give your **opinion** at the end if the lecturer asks for it.

D Present or past?

Read the final section, **Avoid plagiarism**, again. Mark the sentence(s) of the paragraph which:

- give general facts (*GF*)
- talk about the present (*PRES*)
- talk about the past (*PAST*)
- give advice (*ADV*)

Research at university

You must do a lot of assignments at university. For most of the assignments, you must do research. Do a lot of research. Then you will get good marks. But you must do *good* research.

1. Go to the library

At one time, students did research in the university library. Nowadays, most students do research on the Internet. But the university library is still there. It is still an excellent place for students. Try the library first! Firstly, the information is organized. Secondly, it is checked. Thirdly, the librarian can help you. But perhaps the library is closed or the book you want is out. Then you must use the Internet.

2. Use *academic* sources

Type 'What is a good teacher?' into Google. You get nearly four million webpages! But a lot of those pages are commercial. Look for the domains .co.uk and .com. Don't read these sites. They want to sell you something. Other webpages are private sites. A tilde (~) says 'This is a private site'. Don't read these sites either. Nobody has checked the information on these sites. Look for academic sites (.ac and .edu). Look also for .org and .gov. These are not commercial sites.

3. Use more than one source

Do not get all your information from one source. Firstly, perhaps the source is not accurate. Secondly, perhaps the source does not have complete information. Finally, you risk plagiarism – see below. Choose at least three academic sources. Never use Wikipedia! It is not an academic site. Take notes from each source. Then use your own words to report the information. Always record your sources. At one time, it was easy to find the source again. Nowadays, it is often hard to find a website a second time. Copy the complete web address of the article. Write the date of your search. Keep it with your notes.

4. Avoid plagiarism

Plagiarism is copying someone's work. The word comes from Latin. It means to 'steal or kidnap'. At one time, students stole paragraphs from webpages. Lecturers accepted their work. But in 2001, a lecturer at an American university checked student assignments. He had a new computer program. He found 158 cases of plagiarism. Forty-eight students had to leave the university. Nowadays, all university lecturers use computer programs. They find plagiarism easily. Don't cut and paste from websites. Sometimes, the lecturer gives no marks for an assignment with plagiarism. Sometimes, the university asks the student to leave.
